

1 Introduction

The TBPCP1-20100 is a RF pulse current monitoring probe, expanding the Tekbox product range of affordable test equipment.

The probe has a very flat response from 20 Hz to 100 MHz and is characterized over the frequency range from 1 Hz to 200 MHz. The TBPCP1-20100 is typically used for surge or RF pulse current monitoring applications in the time domain, in contrary to RF current monitoring probes designed for EMC applications, which are typically used for measurements in the frequency domain.

4 Typical transfer impedance table

The table below shows typical transfer impedance data of a TBPCP1-20100 pulse current probe. Each current probe is delivered with its corresponding measurement protocol. The transimpedance is given for a 50 Ohm load.

Transimpedance [V/A] = $10^{(dB\Omega/20)}$ @ 50 Ohm

Transimpedance [V/A] = $2 \cdot 10^{(dB\Omega/20)}$ @ High Z
